CITROPULPA®
CITRUS PULP PELLETS FOR ANIMAL FEED

great
nutritional
value

 Extensive
Benefits

Designed to be a feed ingredient of unsurpassed source of fiber and energy for dairy and beef cattle, equine and swine; Citropulpa® can replace a significant part of the energy ingredients in animal feed.

Citropulpa® is enhanced with citrus molasses, giving the product higher energy content. Its distinctive aroma and flavor make the product more palatable and digestible. Its high level of effective fiber helps improve digestion and keeps glucose levels in the blood, improving fertility and weight.

Citropulpa® increases the cow's body reserves, which result in higher levels of milk production and milk solids.

Servings

recommended daily ration*
